

uKeg

Dispensing system

» **Be your own bartender wherever you go.**

The uKeg is a unique product that gives you the functionality of a full-bar system, letting you be your own bartender wherever you go.

Vacuum insulated so your beverage stays cold all day, the uKeg is perfect for keeping craft beer fresh or holding your own cocktail creations and then taking it with you to share with friends.

The founding mission at GrowlerWerks was to make a growler that worked. After testing all the options available, they realized that nobody had cracked the code on a pressurized growler to keep beer fresh. So they designed the uKeg:

- it's easy to use
- automatic regulator cap that holds CO₂ inside
- variable carbonation from zero (off) up to 15 psi
- a dispensing tap so beer can be easily served without removing the cap
- a liquid sight glass
- an ergonomic handle
- easy to clean
- stays cold 8 hours or more.
- fits perfect in your refrigerator door
- **gooseneck:**
 - can turn sideways
 - turn to transport or dispense sideways
